CALL FOR PAPERS

The 6th International Symposium on Communications, Control, and Signal Processing (ISCCSP 2014) is intended to be a forum for technical exchange amongst scientists having interests in these areas. The technical program will include plenary lectures, regular technical sessions, and special sessions covering the three major tracks.

History can be touched in Athens, the ancient Greek center of philosophy, classic art, and architecture, where the standards of beauty, grace, and realism in the world of arts were set. Ancient history and modern times fuse and give to the city its unique character of a lively multi-cultural metropolis.

Prospective authors are invited to submit full-length, four-page original papers in portable document format (PDF) to the ISCCSP Technical Program Committee. All papers will be handled and reviewed electronically. Proceedings of the Symposium will be submitted to IEEE Xplore and electronic copies will be provided to attendees. Please note that at least one full paying author of each accepted paper must register for the Symposium before the indicated deadline.

Besides the technical program, a very entertaining social program is planned. Special tours to tourist attractions will be available to the symposium attendees and their guests.
